

New era starts for Rescompany Systems

Salzburg/Sydney, Oct 2008

A new era is starting for Rescompany with the obtainment of two additional software packages. Lisil Software specializes in the development of shipboard property management including inventory management and POS (Point of Sale) and currently has a total of 45 active shipboard installations. The second system called Meabis is a sophisticated hotel property management package. This system allows Rescompany to cover the specific requirements of hotels and combined with the RESCO CRS opens up opportunities for hotel chains.

All in all Rescompany is now offering RESCO CRS (Central Reservations), RESCO CRM (Customer Relation Management), RESCO SMS (Ship Management System), RESCO POS (Point of Sale), RESCO INV (Inventory Management System) and RESCO HMS (Hotel Management System). All systems are based on the same technology and form a comprehensive product portfolio which is unique to the market place.

Thomas Pfitzer, Managing Director of Rescompany Systems, about this big step: "With the help of our British investor we were able to gain this important addition for Rescompany. We are delighted that the key people and the development team from Lisil and Meabis will join Rescompany. The synergies created by the vast knowledge of all 3 companies and the combined experience will give Rescompany the competitive edge which differentiates software in this day and age".

In the coming years Rescompany will focus on extending the same level of service, which made the company so successful, to all the former and new Meabis/Lisil clients.

Rescompany, a "Microsoft Certified Partner Company", provides reservation software solutions to the hotel, cruise and travel industry. Besides typical reservation functions, RESCO offers sophisticated CRM and marketing tools throughout its comprehensive product portfolio. RESCO CRS: Central Reservations, RESCO CRM: Customer Relation Management, RESCO SMS: Ship Management System, RESCO POS: Point of Sale, RESCO INV Inventory Management System and RESCO HMS: Hotel Management System are all based on latest Microsoft .NET technology and the powerful MS SQL server.
