

Salzburg, September 2006

Smart All-In-One Property Management System at SMM 2006

iisii software, based in Salzburg, is focusing on the development, sale and support of software for the cruise ship industry as well as for the hospitality business. The core product "iisii Cruise" is an **integrated shipboard property management system** which supports and facilitates the day-to-day operation of a passenger ship ranging from a super-yacht or a river ship with 100+ passengers capacity to mid- and large-sized vessels with 1,000 passengers or more.

The core of "iisii Cruise" consists of POS, Front Office, Back Office, Cashbook, Excursion Sales and Gangway Security. A POS-Module is fully integrated into the system thus sparing the users from interfacing problems with other software. Additionally, a **wide range of add-on modules** like hospitality administration or questionnaire analysis, are available and can also be used independently.

All modules are based on the same platform - there are no interfacing issues. "Our concept '**one Platform, one Database, one System**' makes 'iisii cruise' less complex than comparable systems", knows Josef Ganitzer, Managing Director from iisii software. "Our application is much easier to administer and support than solutions of competitors. Further, the cost of ownership is substantially lower as we reduced software licensing and hardware costs."

A young team, dedicated and motivated, has strong expertise in management and information technology and has gained during the past decade a wealth of experience in developing software for marine hotel use. **Support is provided seven days a week**, twelve hours a day, urgent calls are responded within 24 hours.

"iisii cruise" (or modules of the full system) is currently installed on fourteen cruise and river ships, including "MS Amadea" (Phoenix Reisen), "Thomson Celebration" (Thomson Cruises) and "Delphin" (Hansa Kreuzfahrten). For the full list of clients of clients and for more information please visit our website at <http://www.iisii.com>.

Interested customers have the possibility to get a system presentation at the international fair for **Shipbuilding, Machinery & Marine Technology (SMM) from September 26th - 29th 2006** at the Hamburg exhibition centre. You will find iisii Software in **Hall 6, Stand Number 170** in a special technology pavilion which is focusing on passenger shipping. Hogia Ferry Systems, Hogia Terminal Systems, Amadeus Hospitality, Rescompany Systems, Maritime Communications Partner, Otrum, Scandinavian Micro Systems, ShipPax Information, Vingcard Marine and Wonderland are also participating at this stand.
