

Salzburg, May 2007

## Delphin Voyager started cruising with iisii cruise

Following the christening of “Delphin Voyager” on May 18th in Hamburg, Germany, the ship departed for her summer program to the Baltic Sea, Island–Spitsbergen and Norway. In autumn, “Delphin Voyager” will sail around Western Europe before offering cruises in the Mediterranean and Black Sea.

“Delphin Voyager” is the new flagship of Delphin Cruises offering space for 650 passengers in 325 cabins. The ship was built 1990 in Japan as “Royal Olympia” and has been totally refurbished in Piraeus, Greece. The four star ship is offering attractive routes for a good price–quality relation and will mainly be market in the German speaking countries.

“We are delighted to be part of Delphin Cruises’s expansion plans and are proud to have been chosen to supply our shipboard property management system ‘iisii Cruise’ to the ‘Delphin Voyager’”, commented Josef Ganitzer, Managing Director from iisii software based in Salzburg, Austria. “With our products installed on board we view our contribution to Delphin Cruises as a key partner in furthering their business goals”, continued Ganitzer.

The core of “iisii Cruise” consists of POS, Front Office, Back Office, Cashbook, Excursion Sales and Gangway Security. The POS module is fully integrated into the system. Additionally, a wide range of add–on modules like comment card analysis, safety management, crew scheduling, etc. are available and can also be used independently. Compared to other systems the concept “one Platform, one Database, one System” makes “iisii Cruise” less complex and the application is much easier to administer and to support.

“iisii cruise” (or modules of the full system) is currently installed on 24 cruise and river ships, including “MS Amadea” and “MS Albatros” (Phoenix Reisen), “Thomson Celebration” (Thomson Cruises) and “MS Jules Verne” (Club Cruise). For the full list of clients and for more information please visit [www.iisii.com](http://www.iisii.com) or call +43/662/832084.
